Who is NG³ ?

Funded in 2012 by Damien Féger, NG3 (New Generation, Natural Gas, Natural Growth) is a French Greentech company, committed to innovative solutions to improve the safety, the efficiency and the environmental footprint of the marine industry.

Innovation is in our DNA !

NG3 builds its development on :

- A port folio of **patents & technologies**
- A team of **subcontractors** specialized in the relevant technologies
 - An international network of **agents**
- Industrial **partnerships** with companies offering business synergies, acting as added value sellers of our technologies by including them in their solutions

NG3's products

PLUG	ECOFLARE	SMART
		
<ul style="list-style-type: none">▪ NG3's Shore Connection Solution▪ PLUG offers a fast, secured, automated connection to the shore▪ The product can be adapted to any type of vessel and port requirements (in terms of footprint, or weather conditions)▪ CE marked product	<ul style="list-style-type: none">▪ NG3's Gas Combustion Unit▪ ECOFLARE offers an efficient way of disposing of excess boil off gas on board LNG fueled ships or LNG bunker vessels, in order to control the pressure of their gas system.▪ Design can be sized to requirements.	<ul style="list-style-type: none">▪ Self Mooring And Releasing Technology▪ SMART is a prototype that ensure fast, easy, cheap and reliable mooring and releasing to calling vessels.▪ SMART is mainly marketed as a complement to PLUG to make operations even faster, hence enhancing ROI.

NG3 - PLUG

NG3's Shore Power Connection

The PLUG,

- Offers a fast, secured, automated connection to the shore
- Can be adapted to any type of vessel and port requirements
- Is a CE marked product
- Delivered to Hurtigruten & Color Line

Industrial partnership

- To ensure industrial strength/capacity/production experience , NG3 has teamed with the Eiffage group flare division, which is responsible for detailed design, manufacturing , test and commissioning
- NG3 is seeking as well similar partnership to serve Far East shipyards

Design, Engineering, Manufacture,
Assembly and maintenance of
Flare system
